

NOTICE TO ALL RESIDENTS

Please do not flush wet wipes, paper towel, facial tissue

Prevent costly emergency repairs by flushing only human waste & toilet paper

As the COVID-19 situation continues, some municipalities are reporting issues with residents flushing items such as wet wipes, paper towel and facial tissue.

When these items are flushed, they can cause pipe blockages and sewage overflows in homes and businesses. They can also cause costly, serious issues in our wastewater system, including damage to important equipment. Service disruptions could occur as a result.

Now more than ever, we need to focus our financial and staffing resources on supporting our community – rather than on dealing with preventable emergency repairs.

**The only things that go down the toilet are the 3Ps:
Pee, Poo & Toilet Paper. No exceptions.**

Even items labelled “flushable” should not be flushed. That’s because they do not break down like toilet paper does. If you have any questions about where to dispose of something, please contact Township of Lucan Biddulph at (519) 227-4491.

With your help, we can keep our wastewater system running smoothly and our community’s resources focused where they are needed most.

Thank you and please share this message with your family and friends.

A message from Township of Lucan Biddulph in partnership with our wastewater operator, the Ontario Clean Water Agency.
